

Product Fiche according to Delegated Regulation (EU) 392/2012

|                                                                      |                    |
|----------------------------------------------------------------------|--------------------|
| Supplier name or trademark                                           | Haier              |
| Model identifier                                                     | HD90-A3Q979RU1     |
| Rated capacity (kg)                                                  | 9                  |
| Type of dryer                                                        | Heat Pump Inverter |
| Energy efficiency class                                              | A+++               |
| Weighted Annual Energy Consumption (kWh/year) (1)                    | 194                |
| Automatic dryer                                                      |                    |
| Energy consumption of the standard cotton programme (2) at full      | 1.62               |
| Energy consumption of the standard cotton programme (2) at           | 0.88               |
| Power consumption of the off-mode (W)                                | 0.46               |
| Power consumption of the left-on mode (W)                            | 0.63               |
| Duration of the left-on mode (min)                                   | 40                 |
| Weighted programme time of the standard cotton programme (2) at      | 157                |
| Programme time of the standard cotton programme (2) at full load     | 200                |
| Programme time of the standard cotton programme (2) at partial       | 120                |
| Condensation efficiency class on a scale from G (least efficient) to | B                  |
| Average condensation efficiency of the standard cotton programme     |                    |
| Average condensation efficiency of the standard cotton programme     |                    |
| Weighted condensation efficiency for the standard cotton             | 80                 |
| Sound power level (weighted average value in dB)                     | 59                 |
| Built in / free standing model                                       | Freestanding       |

1) Energy consumption in kWh per year, based on 160 drying cycles of the standard cotton programme at
