

**Product fiche pursuant to Delegated Regulation (EU) no. 392/2012**

|  |                                 |
|--|---------------------------------|
| Brand  | CANDY                           |
| Product name / Commercial code                         | SLH D813A2-S                    |
| Medvilninių skalbinių svoris (kg)                      | 8                               |
| Džiovituvo tipas                                       | Su šildymo elementu (Heat Pump) |
| Energijos efektyvumo klasė                             | A++                             |
| Bendros metinės elektros energijos sąnaudos (kWh)      | 236                             |
| Asciugatrice automatica                                | Yes                             |
| Elektros energijos sąnaudos/standartinis ciklas (kWh)  | 1,95                            |
| Consumo di energia a carico parziale in kWh            | 1,08                            |
| Consumo di potenza in W in modo spento                 | 0,2                             |
| Power consumption stand by (W)                         | 0,75                            |
| Weighted programme time                                | 172                             |
| Durata del programma cotone standard a pieno carico    | 225                             |
| Durata del programma cotone standard a carico parziale | 133                             |
| Water recovery class                                   | B                               |
| Weighted condensation efficiency                       | 84                              |
| Classe di efficacia di condensazione in %              | 84                              |
| Average condensation efficiency % partial load         | 84                              |
| Triukšmo lygis (dB (A) / 1 pW)                         | 67                              |
| Build in / free standing model                         | Laisvai pastatomos              |

1) based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low-power modes. Actual energy consumption per cycle will depend on how the appliance is used

\n

2) The 'standard cotton programme' used at full and partial load is the standard drying programme to

which the information in the label and the fiche relates. This programme is suitable for drying normal wet

cotton laundry and it is the most efficient programme in terms of energy consumption for cotton.
